

VCE-PRO-Custom

PCMCIA Analog Card for Laptops

CardBus Video Capture Card with user specified cable lengths and terminating connectors

Video acquisition from a single NTSC, PAL, SECAM or RS170 camera
 Can switch between two S-Video or composite inputs
 Auto NTSC / PAL format detection and automatic gain control are included
User specified cable lengths and terminating connectors

IMPERX VCE-PRO-C PCMCIA CardBus video capture card allows users to display, capture, store and preview full motion video on laptop computers. The VCE-PRO-C can capture single or multiple frames and standard AVI clips from any NTSC, PAL, SECAM or RS170 video source. A built in capture delay function enables users to program the IMPERX VCE-PRO-C frame grabber to record event sequences for playback at later dates/times. Each captured frame can be stamped with a user message along with the date/time of capture. A specially designed image viewer provides the flexibility to view, scroll or step through the recorded images. IMPERX VCE-PRO-C PCMCIA CardBus frame grabber comes with easy to use camera configuration software for fast integration into demanding machine vision environments.
